Frankonia Solutions

Frankonia is a globally recognized technology specialist for EMC anechoic chambers, reverberation chambers, antenna chambers and test systems in the automotive, military and industrial sectors.

Driven by expertise, flexibility, and state-of-the-art technology, we deliver high-performance testing solutions worldwide. Our fully integrated project execution unites in-house engineering, manufacturing, unique absorbers, installation, research, and dedicated services - delivering measurable value from concept to completion.

Frankonia **provides**

- › Pre-compliance and full-compliance anechoic chamber solutions
- › Semi-anechoic and fully anechoic EMC chambers
- › High-performance antenna measurement chambers
- › Reverberation chambers featuring own performance stirrer technology
- › Standardized systems or fully customized chamber designs
- › Tailor-made EMC test systems
- › Innovative positioning and automation solutions
- › Exclusive Frankosorb® absorber technology

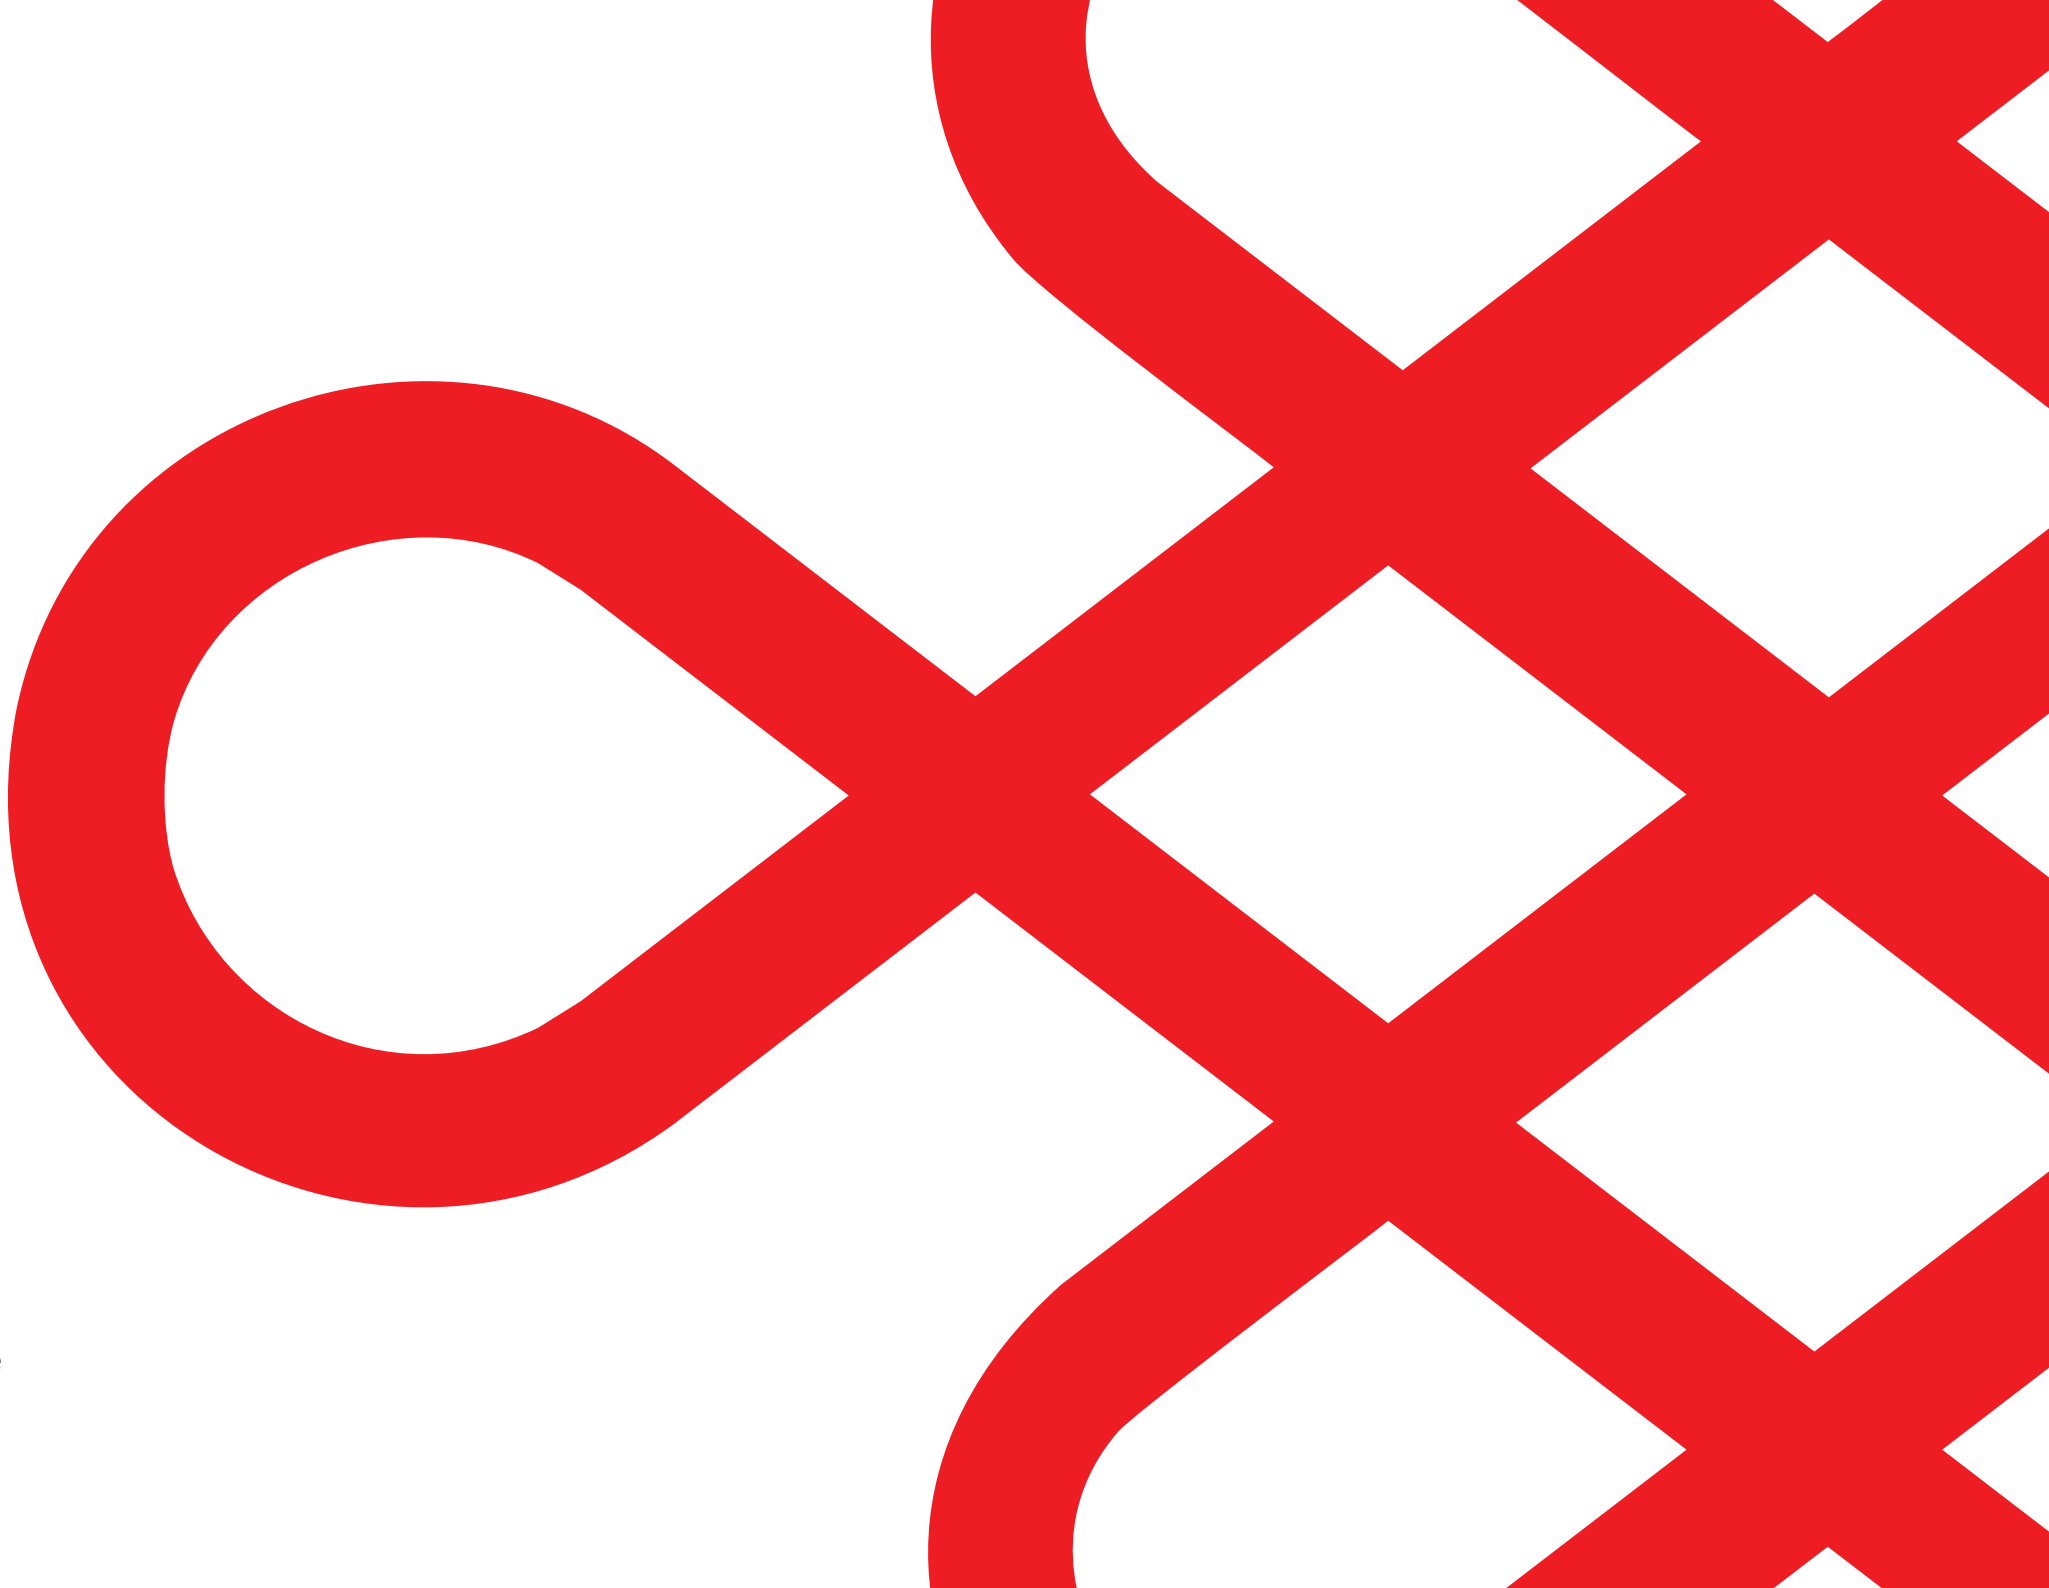

Frankonia **stands for**

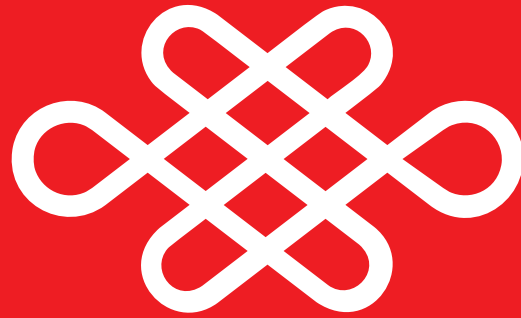

- › Advanced anechoic chambers and integrated test systems
- › Turnkey solutions with general contractor responsibility
- › Comprehensive expertise across every stage of the project lifecycle
- › Extended services, including planning, consultation, and test readiness support
- › Complete solutions from a single source
- › In-house engineering and manufacturing excellence
- › A high-quality, performance-driven product portfolio
- › Global presence with worldwide project execution and service

As a preferred partner for complete test facilities, Frankonia delivers fully customized solutions from initial concept to final implementation. Our highly experienced and passionate teams combine decades of industry expertise with close customer collaboration to engineer solutions that meet today’s demands and anticipate tomorrow’s standards.

With a fully integrated, holistic approach to EMC and antenna laboratories, we provide unmatched technical excellence and project leadership across every phase of the lifecycle.

For more than 35 years, leading testing institutes, electronics manufacturers, and companies in the automotive and defense industries worldwide have trusted Frankonia for cutting-edge technology, uncompromising quality, mastering complexity, and reliable performance.
